Hand hygiene is a key measure to prevent the spread of infectious diseases.

Regular handwashing with soap and water for at least 20 seconds is essential. Using hand sanitizer when soap and water are not available is also important.

Hand hygiene should be practiced before and after meals, after using the toilet, and after touching public surfaces.

Proper hand hygiene can significantly reduce the risk of infection and illness.

Hand Hygiene

1. Wash hands with soap and water for at least 20 seconds.	
2. Rub hands together, covering all surfaces.	
3. Rinse hands thoroughly with water.	
4. Dry hands with a clean towel or air dryer.	

Hand Sanitizer

1. Apply a small amount of sanitizer to your palms.	
2. Rub hands together, covering all surfaces.	
3. Continue until hands are completely dry.	

Proper Handwashing Technique

1. Wet hands with water.	
2. Apply soap and lather.	
3. Rub hands together for 20 seconds.	
4. Rinse hands thoroughly.	
5. Dry hands with a clean towel.	

Remember: Hand hygiene is a simple but effective way to protect yourself and others from illness.
